

King's College London Implements Omada Identity Suite

Omada Identity Suite Eases Staff and Student Identity Administration

KING'S
College
LONDON

Country: Great Britain

Industry: Education

Profile:

King's College London was founded in 1829 as a university college. King's College London is one of the top 25 universities in the world and the fourth oldest in England. Based in the heart of London, King's has 20,000 students from more than 130 countries, and 5,000 employees. King's has an outstanding reputation for providing world-class teaching and cutting-edge research.

Solution:

Implementation of Omada Identity Suite to automate identity lifecycle management

King's College London, has successfully automated identity lifecycle management with Omada Identity Suite to provide a dramatically improved automatic provisioning and role-based user management system.

King's College has 20,000 students and the enrolment process that enables the provisioning of access to multiple resources, systems, and services can be demanding and resource intensive.

The combination of identity lifecycle management and the award-winning Omada Identity Suite, makes a compelling solution. Omada offers a delegated administrative interface that matches King's College existing registration processes, providing enhanced workflow and role management capabilities, whilst identity lifecycle management connects to the many underlying databases and directories at King's and fulfils requests initiated in Omada Identity Suite.

Omada has extensive experience and a track record of implementing identity management solutions based on Microsoft and Omada solution for leading global enterprises.

"Like many organisations, King's College London is looking to improve and streamline its identity management processes. With its highly flexible and user-friendly architecture, Omada Identity Suite will provide us with a robust and supportable system, and an extensible platform which can be enhanced to meet our longer term needs," says Lynne Tucker, CTO of King's College.

The identity management environment at King's College is highly complex. The Omada solution had to replace a venerable home-grown registration system and address the complex and ever-changing needs of a diverse user community. Also automated identity lifecycle management processes were connected to both e-Learning, library and information systems significantly easing the burden on administrative staff.

Omada Identity Suite

Omada Identity Suite is a Microsoft based solution for advanced role based access control and compliance. The solution integrates seamlessly with various systems including Microsoft FIM 2010, Active Directory (AD), SAP, etc., to deliver a complete solution for identity lifecycle management by providing the following features:

- ✓ Advanced Role Based Access Control
- ✓ Compliance Reporting and Audit Trail
- ✓ Workflows with Approval
- ✓ Self Service
- ✓ Segregation of Duties
- ✓ Delegated Administration
