Krka Implements Omada Identity Suite

Automated Identity Management Increases Security and Compliance

Country: Slovenia

Industry: Pharmaceutical

Profile:
Krka is one of the top generic pharmaceutical companies in Europe focusing on prescription pharmaceuticals, self-medication products, and cosmetic products. Krka's products are sold in over 70 countries in five different regions: Slovenia, Central Europe, South-East Europe, East Europe, West Europe and Overseas Markets.

Solution:
Implementation of Omada Identity Suite for identity management, compliance reporting and attestation, and segregation of duties (SoD).

Krka - a top generic pharmaceutical company headquartered in Slovenia manufactures prescription pharmaceuticals, self-medication products, and cosmetic products. Krka's strategy is to produce pharmaceuticals meeting every requirement of quality, efficacy and safety. To automate its identity management and enhance security and compliance Krka has chosen Omada's identity management solution.

Complete Identity Management Solution

To maintain alignment with corporate goals, Krka chose to implement a complete, end-to-end identity management solution. They needed to automate the process of provisioning users and their access rights and empower users to perform self-service functionality for requesting additional access rights and password management. Krka also had to be able to demonstrate to auditors who has access to which systems and applications and why the access was granted.

Omada's partner in Slovenia - Agito, has implemented the solution resulting in Krka having an identity management solution that enables them to increase the security of its IT environment, automate and centralize the user provisioning processes, and to comply with various pharmaceutical regulatory legislation.

"*With the purchase of Omada Identity Suite Krka is able to integrate all the target systems in our heterogeneous environment, including SAP GRC,*" says Robert Bilicic, IT - SAP GRC project manager for Krka. The solution will automate the process of on-boarding, transferring, and off-boarding users.

Effective Auditing

"*Krka will be able to report on and demonstrate to auditors and other regulatory officials that their business policies are being followed,*" says Mark Kozak, Account Manager for Omada. "*The company will be able to show not only which access rights a user has, but how that access was granted by having a complete audit trail throughout every process; recording who initiated the request, the approver, and the reasoning behind the request and the approval.*"

"*After implementation, Krka will see clear benefits from using Omada Identity Suite. The full solution including identity lifecycle management will be implemented by Agito and Microsoft,*" says Uroš Ponikvar , Director of Agito. "*Agito and Omada offer world class identity management solutions that are built upon Microsoft technology.*"

Omada Identity Suite

Omada Identity Suite is a Microsoft based solution for identity and access management and compliance control. The solution integrates seamlessly with various systems including Microsoft FIM 2010, Active Directory (AD), SAP to deliver a complete solution or identity lifecycle management.
