

LFB Group Implements Omada Workflow Builder

Omada Workflow Builder for FIM 2010 Project

Country: France

Industry: Biopharmaceuticals and biotechnologies

Profile:

Ranking first in France, and 6th in the world for plasma-derived medicinal products, LFB is the leading biotechnology company in France. A biopharmaceutical group, and a French state-owned company, LFB Group is dedicated to developing, manufacturing and marketing medicinal products for serious, and often rare diseases. LFB Group is also one of the leading European companies for the development of new-generation proteins based on biotechnologies. With an annual turn-over of € 432 million and approximately 2000 employees LFB Group is expanding internationally with different subsidiaries in Brazil, Germany, and Great Britain.

Solution:

Omada Workflow Builder for Microsoft Forefront Identity Manager 2010

To meet its challenging Identity and Access Governance requirements, LFB Group sought a solution that would enable them to merge existing business processes with an automated workflow-based provisioning solution to support role management and compliance control.

LFB Group selected the combination of Omada Workflow Builder - an Omada Value Pack for FIM 2010 and Microsoft Forefront Identity Manager. Native strengths of FIM 2010 were embraced and extended using components from Omada that facilitates workflow process management in the FIM 2010 portal.

Graphical Deployment of Complex Business Workflows

With the Workflow Builder from Omada, LFB Group was able to emulate their specific business processes using a graphical workflow designer that support drag 'n drop modeling of workflows and processes.

Gilles Gudefin, Manager of IT Architecture and Compliance at LFB Group says: *"Omada's value packs for FIM and Microsoft's FIM 2010 were selected to meet LFB Group's specific requirements for role management, workflows, provisioning, and compliance controls. In particular, LFB Group is able to use the Omada Workflow Builder to build processes that enable the ordering of assets, including phones, mobility, and IT resources. The flexibility of the process supports "n-levels" of approvals, multiple checkpoints, and clear routing of decisions all in the same, graphical, process."*

Supported by Omada Services, the project was implemented by Omada's partner Harmonie Technologie. Pierre Millot, R&D manager at Harmonie Technologie adds; *"The Omada Workflow Builder and other Omada Value Packs for FIM are beneficial assets in enabling the implementation of enterprise projects that reflect an organization's current business. Further, the modules greatly reduce the overall implementation time and need for custom development."*

Omada Workflow Builder for FIM 2010

The Workflow Builder provides a unique method to build and publish business centric workflows based on FIM 2010. Thomas Boel Sigurdsson, Head of Software Architecture at Omada, elaborates on the background for bringing the Omada Workflow Builder for FIM 2010 to market: *"The idea behind Omada's Workflow Builder is to add value to our customers FIM solutions by automating the translation of business workflows into FIM-driven workflows and add a range of advanced pre-built features. Business personnel are able to collaborate with IT and define the end process graphically. Furthermore, simulations of the process can be run to see exact changes to a process in real time. The Workflow Builder transforms the selected business workflows into the technical artifacts that FIM uses for execution by simply pushing a button. This avoids the countless hours and the potentially error-prone process of setting this up in FIM by hand."*

“The Omada Value Packs for FIM 2010 were selected to meet LFB Group’s specific requirements for role management, workflows, provisioning, and compliance controls.”

- Gilles Gudefin,
Manager of IT Architecture
and Compliance,
LFB Group

Solution Features

Omada’s Workflow Builder for FIM 2010 moves FIM projects onto the fast track. The solution unleashes a new level of efficiency in FIM projects and drives additional business value out of FIM 2010:

- ✓ Reduces time spent on workflow development and modification by enabling easy configuration of business processes using the graphical drag ‘n drop workflow designer
- ✓ Limits the cost of your FIM 2010 implementation by utilizing a powerful project accelerator to deliver your FIM projects faster
- ✓ Provides clean accurate central overviews of workflow architecture
- ✓ Migrates workflows between all environments (dev, test, qa, prod)
- ✓ Provides a framework that ensures all workflows follow best practices in development

Omada Value Packs for FIM

Omada is the international market leader within solutions for Identity and Access Governance. The Workflow Builder is one of the Omada Value Packs for FIM, which deliver the world’s most business-centric Identity Management Solution, enabling companies to achieve administrative savings.

Omada’s award-winning solution is built on the Microsoft stack and supports areas such as compliance reporting and attestation, role-based access control, and user provisioning. Omada Value Packs for FIM integrate seamlessly with various systems, including Microsoft Forefront Identity Manager, Active Directory, SharePoint, and ERP systems such as SAP.

Harmonie Technologie

Harmonie Technologie is a consulting and integration company, specialized in IT system security. The company develops 4 fields of expertise encompassing users, enterprise applications and enterprise data:

- ✓ Security governance to align the security policy concerning business needs to operational objectives
- ✓ Identity management to control identities, access and authorization in line with business regulations
